

	Sugar beet molasses
Technical data sheet	<div> 30/06/2022 Version 1.06 Pág.: 1 de 1 </div>

IDENTIFICATION

Product name:	Sugar beet molasses
Origin/production process:	By-product resulting from the extraction and refining of beet sugar.
Description:	Liquid to semi-liquid product, dark brown. Product derived from sugar beet.
Applications:	Animal nutrition, agriculture

PHYSICAL AND CHEMICAL PROPERTIES:

Composition:	Dry matter	69-71 %
	Totals sugars as sucrose (TSAS)	44-46%
	Ashes	10-11%
	Protein	7-12%
	*Its composition and characteristics depend on several factors such as the origin, the climate, soil and the production process.	
Bulk density:	1,2-1,45 Kg/L	
Expiration date:	12 months stored in temperature conditions not exceeding 30 ° C	

CONTAMINANTS:

Chemical contaminants:	in compliance with Directive 2002/32 / EC and subsequent amendments.
Undesired substances	in compliance with Directive 2002/32 / EC and subsequent amendments.
Heavy metals	in compliance with Directive 2002/32 / EC and subsequent amendments.
Chlorinated hydrocarbons	in compliance with Directive 2002/32 / EC and subsequent amendments.
Microbiology (patogens)	in compliance with Directive 2002/32 / EC and subsequent amendments.

PACKAGING:

Delivery:	Tank truck 25 MT
